A close-up photograph of a torn piece of paper, likely a page from a document or a book. The paper is white and shows significant damage, including a large tear on the left side and several smaller holes and frayed edges. A grid of numbers is visible on the right side of the torn piece. The numbers are arranged in a 3x3 grid, with the top row containing 28, 29, and 30; the middle row containing 31, 32, and 33; and the bottom row containing 34, 35, and 36. The numbers are printed in a bold, sans-serif font. The background is dark and out of focus.

A color calibration target, likely a Munsell Color Services Lab chart, featuring a grayscale step wedge and color patches. The grayscale steps are labeled 1 through 10, with corresponding numerical values for density and colorimetric properties. The color patches are labeled with their respective Munsell colorimetric values (L*, a*, b*).

A color calibration target, likely a Munsell Color Services Lab chart, featuring a grayscale step wedge and color patches. The grayscale patches are labeled 1 through 25, with 1 being white and 25 being black. The color patches are labeled with Munsell color notation (hue, chroma, brightness) and include a 'D50 Illuminant, 2 degree observer' specification. The chart is used for ensuring color accuracy in digital imaging and printing.
